SUMMARY

Software Engineer with 3 years of experience developing and maintaining production-grade mobile, web, and backend applications across e-commerce and enterprise platforms. Experienced in React Native, React, Java, Spring Boot, Node.js, and TypeScript, with hands-on expertise in backend development, RESTful API design and integration, authentication systems, database management, and scalable application architecture. Passionate about building reliable, maintainable, and user-focused software while collaborating with cross-functional teams to deliver high-quality production solutions.

KEY TECHNICAL ACHIEVEMENT

- Developed and maintained commercial mobile and web applications for a production e-commerce platform.
- Built and integrated RESTful APIs across authentication, user management, product catalog, campaign, store, and account management modules.
- Implemented reusable application architecture that improved maintainability and reduced code duplication.
- Contributed to backend development, API validation, debugging, and production issue resolution.
- Delivered responsive mobile and web interfaces with a focus on usability, scalability, and performance.

CORE EXPETISE

Software Engineering

- Mobile Application Development
- Web Application Development
- Backend Development
- REST API Development & Integration
- Authentication & Authorization
- Database Design & Management
- Application Architecture
- Performance Optimization
- Software Debugging & Troubleshooting
- Agile Development
- Cross-functional Collaboration

TECHNICAL SKILLS

Programming Languages

- Java
- JavaScript
- TypeScript
- Python

Mobile Development

- React Native
- Expo
- Expo Router

Frontend Development

- React
- Next.js
- HTML5
- CSS3

Backend Development

- Spring Boot
- RESTful APIs
- JWT Authentication
- CRUD Operations

- API Integration

Databases

- PostgreSQL
- MySQL
- MongoDB
- Supabase

Tools & Platforms

- Git
- GitHub
- Postman
- EAS Build
- Figma

Additional Technologies

- Redux
- Zustand
- JUnit
- API Testing
- Responsive Design

PROFESSIONAL EXPERIENCE

Software Engineer

08/2025 – Present

Parousia

AfrikaPlaza (E-commerce Platform)

Mobile Application (React Native)

Worked on the development and continuous improvement of the AfrikaPlaza mobile application, delivering new features and enhancing existing functionality across multiple modules.

Key Contributions

- Developed and maintained production-ready mobile features using React Native, Expo, and TypeScript.
- Integrated RESTful APIs across authentication, user profiles, stores, products, categories, campaign banners, account management, and checkout-related modules.
- Implemented a centralized campaign banner system with automatic refresh and click tracking.
- Built profile management features including profile updates, image uploads, password management, and account settings.
- Developed country and state selection workflows through backend API integration.
- Improved product detail pages by resolving issues related to pricing, stock validation, promotional discounts, and image rendering.
- Fixed authentication, wishlist, and session management issues to improve application stability.
- Refactored reusable components to reduce code duplication and improve maintainability.
- Collaborated closely with backend engineers to validate APIs, troubleshoot integration issues, and support production deployments.
- Performed API testing using Postman to verify request and response behaviour before frontend integration.

Web Application

Contributed to the development and maintenance of the AfrikaPlaza web platform by implementing responsive features and integrating backend services.

Key Contributions

- Developed responsive web interfaces using React and TypeScript.
- Integrated backend APIs supporting authentication, products, categories, user accounts, and business workflows.
- Built reusable UI components to improve consistency across the platform.
- Fixed production issues and implemented feature enhancements across multiple modules.

- Collaborated with cross-functional teams to deliver high-quality software releases.

Software Engineer

Semicolon Africa

10/2023 – 10/2024

Key Contributions

- Designed and developed backend applications using Java Spring Boot.
- Built RESTful APIs following modern software architecture principles.
- Implemented JWT-based authentication and authorization.
- Designed relational database structures using PostgreSQL.
- Developed reusable service layers following clean architecture principles.
- Wrote unit tests using JUnit and applied Test-Driven Development (TDD).
- Collaborated within Agile teams to deliver scalable software solutions.

Software Engineer

FortunaeIt Solutions

01/2025 – 04/2025

Key Contributions

- Developed frontend and backend features using React, Node.js, Java Spring Boot, and PostgreSQL.
- Designed secure RESTful APIs supporting authentication and business operations.
- Built responsive user interfaces for enterprise software applications.
- Optimized backend services and database queries to improve application performance.
- Collaborated with development teams to deliver production-ready client solutions.

SELECTED PROJECTS

Hotel Booking Management System

Java • Spring Boot • React • PostgreSQL

Designed and developed a hotel reservation platform supporting room management, customer bookings, secure authentication, administrative operations, and RESTful backend services.

XpertView Consultation Platform

Java • Spring Boot • React • MongoDB

Developed a consultation platform enabling appointment scheduling, secure authentication, role-based access, and efficient management of consultants and clients.

Logistics Delivery Platform

Java • Spring Boot • React • MySQL

Built a logistics management application supporting shipment tracking, delivery workflows, operational management, and backend service integration.

VeriSafe – Blockchain Identity Verification Platform

Aiken • MeshJS • Next.js

Developed a blockchain-based biometric identity verification platform integrating wallet authentication and smart contracts for secure user verification.

EDUCATION

Semicolon Africa

Diploma in Software Engineering

Henley Business School, United Kingdom

Diploma in Business Education & Entrepreneurship

Federal College of Agriculture, Akure

National Diploma – Animal Health & Production
